ARGENTINA UPDATE

DAJIN'S EXPLORATION PARTNER, LSC LITHIUM CORPORATION INCREASES HOLDINGS IN SALINAS GRANDES SALAR

March 30, 2017, Vancouver, BC. Dajin Resources Corp's South American partner, LSC Lithium Corporation (TSX-V: LSC) is pleased to report very positive news from Argentina. LSC has entered into agreements with Orocobre Limited and lithium explorer and developer, Advantage Lithium Corporation to acquire additional hectares in the Salinas Grandes salar. This will give LSC control of Salinas Grandes as they are now the largest owner of tenements in the salar. LSC anticipates that once approvals have been given to explore and exploit the lithium prospects in Salinas Grandes it will be positioned to become the sole operator. As they state "LSC sees the Salinas Grandes Salar as a very important strategic asset as it continues to consolidate the highly fractured ownership of tenements in this very large lithium rich basin which straddles both Salta and Jujuy provinces each with their own development criteria. LSC anticipates that the Salinas Grandes will be a core developmental asset of LSC..." ([click here](#) for LSC March 29, 2017 news release)

This announcement is very positive news from Dajin's perspective and underscores the importance of having a land package that covers a significant portion of the salar being developed. It is this strategy that focused Dajin's exploration efforts in Nevada and was a factor in their decision to partner with LSC in Argentina. In Nevada and Argentina there are no regulations governing how companies can share a mobile brine source within a single salar. Controlling the majority of the subsurface rights is a cost effective way to ensure development can move ahead unimpeded. In Nevada, controlling water rights is also an important factor.

Dajin, through Dajin Resources S.A. ("Dajin S.A."), holds concessions or concession applications in Jujuy Province, Argentina that were acquired in regions known to contain brines with Potassium, Lithium and Boron values. These concessions exceed 93,000 hectares (230,000 acres) and are primarily located in the Salinas Grandes/Guayatayoc salt lakes basin. Dajin S.A. is partnered with LSC Lithium Corporation who has agreed to spend \$2,000,000 to earn a 51% interest in Dajin S.A.'s Lithium properties while building a significant presence in Argentina. About Dajin: (www.dajin.ca)

Dajin is an early stage Lithium exploration company holding a 100% interest in 403 placer claims covering 7,914 acres (3,202 hectares) in the Teels Marsh region of Mineral County, Nevada. These claims are known to contain Lithium and Boron values and are adjacent to the birth place of US Borax Corp's first borax mine. Dajin also holds a 100% interest in 191 placer claims covering 3,851 acres (1,558 hectares) in the Alkali Lake region of Esmeralda County, Nevada, located 7 miles (11 kilometers) northeast of Albemarle Holding's Silver Peak Lithium brine operation in Clayton Valley.
